

### Project Descriptions / Visuals

#### Commuting in Santa Rosa

- transportation's leading carbon footprint at state, county, city level
- single-occupant car commuting the norm
- car culture embedded in roadways
- SRJC strikes contracts with transit providers for student access
- sustainability and transportation committees active on campus
- county transportation authority corrals local sector leaders
- community climate activists expose policy needs

### Achievements / Results

#### Your Transportation Associate

- gathered commuter orgs for campus Transportation Fair
- tracked use of carpool parking program
- acquired and marketed carpool permits and SMART Eco-Passes
- calculated and recorded commuter emissions with SIMAP
- drafted sections of school's Climate Action Plan

### Next Steps / Key Outcomes

#### Toward a Sustainable Campus

- permanent transportation position should be established
- carpool program should be expanded
- landscape plan should prioritize bicycle-friendly infrastructure
- traffic calming should be applied to more roadways
- COVID-19-era telecommuting should inform future work policy
