What if I told you the key to achieving global sustainability lies within our social interactions?

- Culture Shift for a More Sustainable World - Harvard University
For centuries, atmospheric carbon dioxide had never been above this line.
Small Group Discussion
1. What connections can you see between social and environmental sustainability regarding the reduction of plastic usage?
2. What connections can you see between social and environmental sustainability here on campus?
3. Think of 3 ways to increase your social sustainability network.
